Abbreviations

EAD	: Export Archive Data
OS	: Operating System
SW	: Software

Software description

EAD is a Simatic WinCC Unified addon application, which makes it easy for users to manually or automatically export data values or alarms, from the WinCC Unified Runtime archives. The data can be exported to CSV- or Microsoft Excel format.

A fully description of the EAD sw package can be found at this website:

<https://swappcon.dk/en/wincc-archive-data-viewer/>

Software requirements

- Supported Simatic WinCC Unified Runtime:
 - o V16
 - o V17
- Supported OS:
 - o Microsoft Windows 10 Pro
 - o Microsoft Windows Server 2019 Standard

Installation procedure

The sw is delivered as an installation package, which must be installed on the WinCC Unified Runtime PC. Complete uninstallation can be done using the standard windows component “Add or Remove Programs”.

User interface

The software can be used, as a normal Windows application, to manually export data values or alarms from WinCC logged archives.

The software can also be set up to automatically export data values, from logged WinCC data archives, to CSV-files.

EAD license

When a customer buys the EAD sw package a license is automatically included.

The license is valid for a 1 year subscription. After 1 year, the license can be extended for another year, at a price of 50% of the original purchase price.

Swappcon ApS can provide a free demo version of the EAD SW-package, which is fully functional for 1 month. Of course, there are no purchase obligations associated with using the demo version.

Pricing

For information about the current sales price, please contact Swappcon ApS by mail : cgr@swappcon.dk
